**ORBIT INTERNATIONAL'S ELECTRONICS GROUP REPORTS
FIRST QUARTER BOOKINGS IN EXCESS OF \$4,700,000**

Hauppauge, New York, April 9, 2025-- Orbit International Corp. (OTC PINK:ORBT), an electronics manufacturer and software solution provider, today announced that its Electronics Group ("OEG") received orders during the first quarter of 2025 totaling in excess of \$4,700,000. Deliveries for these awards have already commenced and will continue through the second quarter of 2026.

Mitchell Binder, President and CEO of Orbit International commented, "We are pleased to report OEG bookings in excess of \$4,700,000 for the first quarter of 2025. These bookings include over \$3,000,000 in orders received by our OEG legacy business and more than \$1,700,000 in orders received by our Simulator Product Solutions LLC ("SPS") subsidiary. The OEG legacy orders for the quarter include a previously announced follow-on contract in excess of \$1,925,000 for product used on a military program for the U.S. Navy. The SPS orders for the quarter were in spite of the delay of several large contract opportunities, which are now expected to be received in the second quarter. Our OEG continues to pursue many business opportunities that we hope will come to fruition in the coming quarters. The timing of receipt of military awards is always an uncertainty."

Binder added, "We continue to be very confident in the progress of our Orbit Power Group ("OPG"). We recorded a very firm booking year in 2024, principally due to record bookings for power supplies utilizing our VPX technology. We continue to be confident that in 2025, we will continue to both receive follow-on business for our VPX power supplies and deliver new designs that will expand our reach in the marketplace for this technology."

Orbit International Corp., through its Electronics Group, is involved in the development and manufacture of custom electronic device and subsystem solutions for military, industrial and commercial applications through its production facilities in Hauppauge, NY and Carson, CA. Orbit's Power Group, also located in Hauppauge, NY, designs and manufactures a wide array of power products including AC power supplies, frequency converters, inverters, VME/VPX power supplies as well as various COTS power sources.

Certain matters discussed in this news release and oral statements made from time to time by representatives of the Company including, statements regarding our expectations of Orbit's operating plans, deliveries under contracts and strategies generally; statements regarding our expectations of the performance of our business; expectations regarding costs and revenues, future operating results,

additional orders, future business opportunities and continued growth, may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and the Federal securities laws. Although Orbit believes that the expectations reflected in such forward-looking statements are based upon reasonable assumptions, it can give no assurance that its expectations will be achieved.

Forward-looking information is subject to certain risks, trends and uncertainties that could cause actual results to differ materially from those projected. Many of these factors are beyond Orbit International's ability to control or predict. Important factors that may cause actual results to differ materially and that could impact Orbit International and the statements contained in this news release can be found in Orbit's reports posted with the OTC Disclosure and News service.
