**ORBIT INTERNATIONAL'S POWER GROUP AND ORBIT INSTRUMENT
DIVISION REPORT COMBINED BOOKINGS OF APPROXIMATELY
\$2,100,000 FOR MONTH OF MAY 2026**

Hauppauge, New York, June 3, 2026-- Orbit International Corp. (OTCID Basic Market:ORBT), an electronics manufacturer and software solution provider, today announced that its Power Group ("OPG") and Orbit Instrument division, a part of its Electronics Group ("OEG") recorded combined bookings of approximately \$2,100,000 for the month of May 2026. Deliveries for these orders have already commenced and will continue through the first quarter of 2027.

Mitchell Binder, President and CEO of Orbit International commented, "We are pleased to report combined bookings of approximately \$2,100,000 for our OPG and Orbit Instrument division for the month of May 2026. Bookings for our OPG were approximately \$1,100,000, due principally to increased bookings for power supplies utilizing our VPX technology. Total 2026 year to date OPG bookings are up 69% compared to the same period in 2025, highlighted by orders for our VPX power supplies. Bookings for these power supplies have been strong throughout 2026 and year to date are up approximately 52% over the prior year comparable period. In addition, our OPG is still waiting on a significant follow-on VPX power supply award from a large defense contractor which we hope will be received prior to the end of the second quarter."

Binder added, "Orders for our Orbit Instrument division were approximately \$1,000,000, approximately \$950,000 of which resulted from a follow-on contract received from a large defense contractor for a product used on a U.S. Navy program. We are also pleased to note that our customer has expressed confidence that the program under which the contract was awarded should continue for many years to come. This award had been expected during the first quarter of 2026 but was delayed at the U.S. Government level. The timing of receipt of military awards is always an uncertainty."

Orbit International Corp., through its Electronics Group, is involved in the development and manufacture of custom electronic device and subsystem solutions for military, industrial and commercial applications through its production facilities in Hauppauge, NY and Carson, CA. Orbit's Power Group, also located in Hauppauge, NY, designs and manufactures a wide array of power products including AC power supplies, frequency converters, inverters, VME/VPX power supplies as well as various COTS power sources.
